

# CCG IMPROVEMENT & ASSESSMENT FRAMEWORK

## Status across domain areas

### NHS Bradford Districts CCG

We spend approximately **£1,486** for every person registered with a GP across Bradford (not including the city). This money gives both local doctors and local people more say in how our health care is organised. We buy services for our communities including some of the poorest communities in England and we want to tackle inequalities that contribute to ill health

\*\*\* Better    \*\*\* Similar    \*\*\* Worse compared to England

#### Self-care

**Better self-care: training**  
\*\*\*

10.3% of staff across health and social care have attended training to support people with better self-care

#### Out of Hospitals

**Carers with a Long-Term-Condition**  
\*\*\*

0.60 score for carers reporting they feel supported to manage their LTC(s) ranks low amongst England's CCGs and we need to improve

#### Urgent & Emergency Care

**Urgent Care Sensitive conditions**  
\*\*\*

We have the high rate of emergency admissions for urgent care sensitive conditions in England with 3,110 per 100,000 population

#### Planned Care

**Gastroenterology**  
\*\*\*

Gastroenterology specialty considering a 24/7 acute model across 2 sites at Airedale Hospital and Bradford Royal Infirmary

#### Better Health

**change 4 life Childhood obesity**  
\*\*\*

1 out of 3 children aged ten or eleven year olds are overweight or obese, this result is the same as the England rate

#### Better Care

**Care Quality Commission Care quality ratings**  
\*\*\*

Ratings for primary care, hospitals and community services are satisfactory. However, ratings for care homes and residential homes show us there is a great need for improvement in our area

#### Sustainability

**Financial performance** Amber

We want to make every pound go further and have developed plans to improve quality whilst saving money. At this time we are not fully delivering planned savings.

#### Leadership

**Quality of Leadership** Green Star

In 2016/17 the quality of our leadership was assessed as joint top in England, this top place is shared with 30 other CCGs.

**Health inequalities**  
\*\*\*

The frequency of people being admitted to hospital for long term conditions, from our poorest communities is much higher than other areas in England

**NHS Constitution Standards**  
\*\*\*

Waiting times for cancer treatment, for hospital out patient appointments and in Accident and Emergency are not meeting the recommended standard

**Uptake of new e-referrals system**  
\*\*\*

Currently only 2 out of 5 referrals are made electronically via the e-referrals services. This needs to be the way all patients are referred by the 1<sup>st</sup> of October 2018

**Effectiveness of relationships** Green

*360 degree stakeholder survey, closed recently - data not yet available*

## NHS Bradford Districts CCG

\*\*\* Better    \*\*\* Similar    \*\*\* Worse compared to England

**Diabetes**  
Structured education  
3 x treatment levels

**Cancer**  
Early diagnosis & treatment improved outcomes

**Mental Health**  
Access to treatment & CYPs

**Learning Disabilities**  
Health checks & in-pts

**Maternity**  
Experience and outcomes of maternity services

**Dementia**  
Prevalence and post diagnostic packages

**Healthy Hearts**  
Heart attacks and strokes

**Breathing Better**  
Asthma and COPD

### Diabetes

**Structured education**  
\*\*\*

**3 recommended Treatment levels**  
\*\*\*

Attendance for people with a new diagnosis of diabetes is low across England at just 7.3%. Our local result is even lower with just 4 out of every 100 attending

Good control of BP, cholesterol and HbA1c (sugar) is important. However, only 2 out of 5 people with diabetes have good control of all three. This is the same across England

### Cancer

**Cancer diagnosis at an early stage**  
\*\*\*

**Cancer survival at one year**  
\*\*\*

Diagnosing cancer at an early stage is important however less than 1/2 of all cancer cases are diagnosed early, this result needs to improve

Almost 3 out of every 4 people with cancer survive beyond the first year. This result is about the same as seen across England

### Mental Health

**Early Intervention Psychosis**  
\*\*\*

**Out of area placements**  
\*\*\*

Access to intervention for psychosis is above the 50% standard, with almost 3 out of every 4 people being seen within 2 weeks for a NICE recommended care package

Reducing out of area placements for people with mental health problems is a key priority – currently we have zero bed days placed out of area

### Learning Disabilities

**Reduce specialist inpatient care**  
\*\*\*

**Health checks**  
\*\*\*

For all three CCGs across Bradford district and Craven the rate of specialist inpatients is 54 per 1 million population. We need to reduce this by at least half

3 out of every 5 people aged 14 or over, with a learning disability receive their annual health check, this result is amongst the highest across England

### Maternity

**Smoking in pregnancy**  
\*\*\*

Recently smoking has increased again with almost 1 in 5 women reporting as smokers at the time of delivering their baby. This result is above the England rate and needs to reduce

**Neonatal mortality and stillbirths**  
\*\*\*

The rate of neonatal mortality and stillbirths has reduced to 7.4 per 1,000 births however there is a national ambition to reduce this to below 0.67 per 1,000

### Dementia

**Dementia diagnosis**  
\*\*\*

**Care planning**  
\*\*\*

4 out of 5 people estimated to have dementia in our population have been found, this result is amongst the best in England

4 out of every 5 people with a diagnosis have care planning and post-diagnostic support in place, again this is amongst the best in England
