

The People's Board

An update: who, what, where, how...

Who
are the People's Board

For those of you who haven't heard us speak previously...

"The People's Board aim to influence Bradford District and Craven CCGs policy and service design. We offer the public's perspective and bring the views and experiences of Bradford District and Craven communities into NHS decision-making"

Where
do we reach

- As of 2019, the People's Board expanded our remit to include Airedale, Wharfedale and Craven areas in addition to Bradford City and Districts.
- We are pleased to have recruited three new Board members and would like to introduce:

Rosema

Claire

Mike

What

have we been doing

Recent work includes:

- **Carers support service engagement** - Helped plan how to gather views and experiences of carers, provided challenge to ensure the CCG/Council engaged with hidden carers and helped identify routes to reach these voices. People's Board members who are also carers were part of panel for carers service procurement process.
- **End of life care** – An exploration of ideas to develop thoughts about the possibility of a strategy around end of life care. Came to the People's Board before any firm decisions made. Will be continuing this work to look at a plan for engagement and strategy development.
